addfield pet cremation solutions
‘The most thermally efficient, robust and reliable pet cremators on the market - Simply Built Better!’

We are one of the UK’s longest established and leading manufacturers of pet cremators.

When you choose to invest in a reliable pet crematoria Addfield should always be your first choice. Our range of pet cremators have been successfully used with the pet crematorium industry for over 30 years.

Customers come to quickly appreciate the robust nature and reliability of the Addfield Cremators that are built to suit the every day demands of the modern pet crematorium. The efficiency of the Addfield Cremators ensures that the end user is guaranteed a fast and efficient cremation every time. The varied range of pet cremators that we manufacture covers the complete spectrum required within the pet cremation industry. From individual chambers to multi chambers to mass cremation, the Addfield range of cremators can be tailor made to suit your individual operation. We offer solid hearth and hot hearth designs to suit specific customers operations.

The refractory structures within our cremators are what we class the "business end of the job". When selecting refractories for these applications we take into account the thermal cycling, high temperature abrasion, maximum temperature rating and porosity of the refractories as these are key elements that dictate a long term refractory life.

Our engineers have over 40 years experience within this discipline alone guaranteeing you a product that is fit for purpose and able to give you a payback on your investment many times over.

*We reserve the right to change the specification, dimensions and quality of materials from time to time, so long as the alteration is minor or an improvement to the said products.*
**Addfield Benefits**
The Addfield Cremators are built to last and give you the user excellent value for money.
- CFD modelled
- Impact / abrasion resistant refractory chamber seal
- 10mm steel casing thickness complete with anti-corrosive paint.
- Thermally efficient with 180mm high grade refractory insulation
- Lightweight insulation lid
- Pulse fired burners
- Addfield intelligent 3 zone controller or optional fully automatic PLC computer operation
- Worldwide on-site engineer support
- DEFRA and DARD approved
- British Built
- We export and service globally
- 12 month unlimited warranty

**Repairs & Maintenance**
Addfield can offer a full range of on site repair services, our highly trained engineers can undertake any repair or retrofit to any make of cremator.
- Rewiring / Electrical repairs
- Refractory repairs and replacement
- Steel repairs
- Annual service

Multi chamber and hot hearth cremator options

Our range of multi chamber machines offer the user an option to cremate individual pets quickly and efficiently guaranteeing no cross contamination between chambers. Their robust design gives a realistic payback on investment, British built and made to last. Multi chamber cremators can range from 2-10 individual chambers that are all independently heated. Their high integrity refractory lining ensures minimal heat loss and high heat retention maximising fuel efficiency for the user.

- Multi chamber cremators available
- Guaranteed no cross contamination
- Efficient fuel usage
- Fast turn around
- Robust Refractory brick or optional cast designs
- 10mm Robust steel casing
- Modular designed, pet and equine systems
- Pulse fired burner system

Optional door positions available on all models

What our customers say

“Working with Addfield has been very easy going, always getting the right information on time. It has been a very good experience. I have big plans for the future I have chosen a building with space for a bigger cremator. I also want to do horses and have already spoken to Addfield to make sure the machine can be made for my space. Choosing Addfield has been the best decision.”
John van der Heijden, Dierencrematorium

“I am more than happy with my Addfield Mini Cremator, the unit is well built, and extremely efficient. I am 78 years old and the PLC is easy to use and very clear, I am very happy with my investment”
Mr Harris, Shinfield Nursery

“Since we started the Suffolk Pet Crematorium in 1999 we have had Addfield Cremators. We now have two, and the original machine is still in use 6 days a week throughout the year.

They are well constructed, retain heat and are simple to use. The pulse burner saves up to 40% on fuel compared to earlier models. Service is second to none and nothing is too much trouble. Our latest machine will take any horse easily. Addfield will design and build to your specificaion and have a great sales team and engineers who are always cheerful.

We hope to purchase a third machine from Addfield, which says it all.”
Bill Phizackle, Suffolk Pet Crematorium
Specialists in the design, manufacture and supply of cremation solutions
