The PET 200 pet cremation machine is designed to be the most efficient solution for cremating medium to large pets. Front opening for ease of loading and de-ashing to optimise your daily throughput to up to 10 pets. Designed for safety, performance and efficiency benefiting from Hot Hearth technology, continuously recycling heat throughout and below the primary cremation chamber, delivering complete 360° heating and reducing cremation time.

Unrivalled in it’s field boasting a 40% reduction in fuel consumption compared to alternative solutions. Perfect machine for new pet crematoriums.

### Machine Specification

### Primary Chamber

- Heavily insulated internal refractory lining. Constructed from high grade refractory brick ensuring a secure self supporting, interlocking arrangement.
- Manually opening, securely locking, access door with viewing port.
- Automatic temperature controlled on-off waste ignition burner complete with internal air fans.
- Hot Hearth Combustion Burner, temperature controlled on-off, complete with internal air fans.
- Secondary combustion burner air fans, automatically controlled distribution to their designated area.
- Two temperature sensor mounting points.

### Secondary Chamber

- Fully insulated internal refractory lining. Constructed from high grade refractory brick and low thermal mass insulation.
- Secondary chamber burnout burner, temperature controlled on-off complete with internal air fans.
- Automatically controlled integrated combustion burner air fans.
- Temperature sensor mounting point at the base of the exit flue ensuring the chamber reaches the necessary 850°C minimum, with a 2 second retention time.

### Optional Extras

</table>
Pre-Fabricated 8mm & 10mm robust mild steel casing, seam welded and suitably stiffened/braced where necessary.

Lightweight resilient refractory fibre insulation door, providing a tight seal, giving excellent thermal efficiency.

Primary chamber lining thickness 180mm rated up-to 1450°C.

Premium paint finish - Steel structures are painted using a two-pack high grade paint system.

Unique Hot Hearth technology enabling increased efficiency of cremation by providing additional heating below the chamber encouraging 360° heat distribution.

Multi-layered refractory lining using fire bricks and insulation bricks, improving thermal efficiency.

Waste Loading and De-Ashing

The PET series of cremators are ergonomically designed for easy and safe loading of most household pets. Loading through the front facing door can be completed manually or with the aid of a hydraulic lifting table. Able to be safely loaded multiple times throughout a cycle to enable multiple individual pet cremations in a day. At the end of every incineration process, ash should be discharged through the loading door onto the supplied catcher tray prior to being loaded for the next burn.

The Addfield Difference

- Pre-Fabricated 8mm & 10mm robust mild steel casing, seam welded and suitably stiffened/braced where necessary.
- Lightweight resilient refractory fibre insulation door, providing a tight seal, giving excellent thermal efficiency.
- Primary chamber lining thickness 180mm rated up-to 1450°C.
- Premium paint finish - Steel structures are painted using a two-pack high grade paint system.
- Unique Hot Hearth technology enabling increased efficiency of cremation by providing additional heating below the chamber encouraging 360° heat distribution.
- Multi-layered refractory lining using fire bricks and insulation bricks, improving thermal efficiency.

Additional Operation Equipment

**Hydraulic Lift Table**
Providing an easier way of lifting weights up to 150kg. Having an extendable bed for safer loading. Height adjustable up to 1.3m, and a pull lever to smoothly lower the table. Ball bearing assisted loading tray.

**De-ashing Tools**
De-ashing tools increase the comfort of de-ashing the cremator. Associated with removing hot ash from the chamber of the cremator straight into the ash box, ready to be processed in the cremulator unit.

**Pet Cremulator**
The cremulator processes the remains of domestic animals and grinds them into a fine ash for returning to the owner. The operation process for this only takes 60 seconds from bone material to a final ash residue.
Controller Features

The Addfield Intelligent Controller has been developed to provide you with a simple yet effective operational process. Designed around a touch screen HMI interface, and independent burner control switches.

The touch screen interface provides all of your essential operations at the press of a finger. Having pre-loaded programmes optimised for your individual requirements, waste type and operating regime.

Giving you instant access to live temperature readings for the primary and secondary chambers and remaining burn time to enable you to manage your incineration process more efficiently.

Simple to install with a plug and play interface which enables straightforward installation and maintenance.

Built in data-logging to automatically records you usage, timings and temperatures achieved. Archives all essential which is able to be exported to Excel through the removable USB drive.

Key Features

- Plug and play design
- Zone ramp sequence multi zone controller.
- Incoming and outgoing cable terminations.
- Burner control gear.
- Interface relays and contractors.
- Temperature indication and control of the primary chamber.
- Temperature indication and control of the secondary chamber.
- Plant status indicators.
- Cycle status indicators.
- Fault status indicators.
- Operator interface.
- Data-logging
- USB Port.
