

Pet Cremation

Pet Cremulator

Compact cremulation machine for processing the ash remains after a cremation.

Accessory Features

The Addfield cremulator is designed for the use of processing animal remains once they have been cremated.

The machine powders the remains into a fine ash which makes it ideal for all crematoriums who do individuals cremations.

The result is a more visually appealing remains format for the operators to return to the pet owners.

The operation process lasts for as little as 2 minutes and once it is complete the ash can simply be tipped into a waiting receptacle via the pivoting arm to maximise the ease of use.

Ergonomically Friendly

This state of the art machine has a dust tight seal on the drum of the lid which prevents leakage and a robust 6mm thick mild steel blade. The advanced pulverisation system is quiet, dust free and shuts off automatically once the process has finished.

We also manufacture an equine cremulator to deal with large ash quantities, such as horse remains.

Cremulator Specification

External Length (mm)	935
External Width (mm)	325
External Height (mm)	1470
Chamber Volume (m³)	0.006
Weight (Approx. kg)	60

*We reserve the right to change the specification, dimensions and quality of materials from time to time, so long as the alteration is minor or an improvement to the said product.
