

Pet Cremation

World leaders in
Pet Cremation Technology

addfield
pet cremation solutions

‘The most thermally
efficient, robust and reliable
pet cremators on the market -
Simply Built Better!’

The global leader in pet cremation.

Addfield pet cremators are leading the market in quality of construction, fuel efficiency and operational benefits. Whether you are looking for your first machine or your next, we have the solution to suit you.

You can find Addfield machines installed in over 140 countries. Proudly supplying some of the worlds largest and most successful pet crematoriums.

All built along three core principals; Efficiency, Economy and Ergonomics and have been expertly refined for years to excel in every way.

Efficiency – Each machine is purpose built for securely cremating all household pets. Comfortably managing 7 to 60 pets in any one day. Specially optimised automatic operation ensures that you get the most out of your time everyday.

Economy – Premium construction at a fair price gives you a machine that can achieve a return

on investment in as little as twelve months. Up to 40% more fuel efficient than most other manufacturers, delivering returns that continue to add up year after year.

Ergonomics – Combining advanced thermal construction for a safe and comfortable working environment, with optimised loading chambers and accessories. Provides you a machine that you can operate safely and easily.

To fully appreciate the quality of an Addfield you are invited to see for yourself the level of craftsmanship that goes into every machine as it's built by hand in our factory in the UK. To learn more you are invited to come and visit us, our doors are always open.

For the past 40 years we have transformed the way that cremators have operated and our expertise and knowledge is second to none.

Weight (Approx. Tonnes)	3.2	8.5	14	34	11.5

*We reserve the right to change the specification, dimensions and quality of materials from time to time, so long as the alteration is minor or an improvement to the said products.

Accessories

Improve your operational efficiency and comfort with our recommended accessories. Our lifting table effortlessly lifts and transports even the largest of dogs helping you to place them into the optimal position in the cremation chamber. The cremulator remains processor transforms all ashes and fragments into a fine ash ready to return to your customers in only a couple of minutes. We also supply a selection of stretchers, transport bags and de-ashing rakes and equipment to help you run your successful crematorium.

Equine Cremation

The Addfield Difference

When you choose to invest in Addfield you can expect:

- ✓ FREE consultation and site survey.
- ✓ Planing and permitting support.
- ✓ Pet crematorium layout design.
- ✓ Full training online and onsite.
- ✓ 10mm thick premium steel outer casing.
- ✓ Long lasting, anti-corrosion paintwork in any colour you choose.
- ✓ Fuel-efficient 180mm triple layered refractory.
- ✓ Ergonomic loading with manual and pneumatic door options.
- ✓ Access to worldwide engineer support.
- ✓ Environmentally approved by DEFRA & DARD.
- ✓ 12 month unlimited usage warranty.
- ✓ Widest range of bespoke options available.

Self Contained Option

Available as a free standing cremation facility our fully containerised option, includes a generator, fuel tank and control panel all fitting comfortably within a 20ft container. Spacious enough to operate a lifting table and cremulator within.

A highly adaptable solution, which can be up and operational rapidly in almost any location. You can install a range of decorative cladding, such as wood panelling to help it blend seamlessly into its surroundings.

Servicing & Spares

Addfield Pet cremators have an operational life expectancy of over 20 years regular use. To ensure optimal results we recommend annual servicing. As well as maintaining Addfield cremators our highly trained engineers can repair or retrofit any make of cremator to ensure that you and your business keep running smoothly.

- ✓ Comprehensive spares facility
- ✓ Rewiring / Electrical repairs
- ✓ Refractory repairs and replacement
- ✓ Steel repairs
- ✓ Annual service

Multi-chamber, rotary and bespoke solutions

Our premium range of multi-chamber machines, offers you the option to cremate several individual pets at the same time. Each chamber is sectioned to prevent cross contamination between pets.

Operating between two and ten chambers within one unit gives you incredible flexibility and opportunities. Highly economical to operate on a chamber by chamber basis, alongside Addfield's renowned fuel efficiency, enables you to achieve a rapid return on your investment.

- Up to ten cremation chambers
- No cross contamination
- Efficient fuel usage
- Pulse fired burner system
- Modular designed, pet and equine systems
- High capacity, rotary and bulk solutions available

What our customers say

"Fantastic company to deal with and the machines supplied are exceptional quality. Highly recommend Addfield as a business and the staff are a credit to the company. Customer service is clearly a priority."
Rainbow Bridge Pet Cremation

"After doing a lot of research we decided on Addfield. As soon as I spoke to them I knew we had made the right choice. They invited my wife and I down and showed us the machine which we were looking at. After weeks of going back and forth with questions of which every time were answered immediately helping and guiding us we purchased the PET200. When we were ready for it, it was delivered as planned and was set up by one of the engineers who is always on the

other end of the phone if you need him. Overall fantastic company and fantastic after-care. Thanks for all the support."
Darren Bates, Roxy's Rainbow

"I purchased a PET200 from Addfield. I was given a tour of the manufacturing plant, welcomed into the offices to chat with staff, asking a range of questions, all of which were answered at length with confidence and authority. I have received the same excellent after-sales care, with no question too simple and advice on maintenance and running given in friendly, jargon free terminology, making the machinery and instrumentation feel very user friendly and easy to operate."
Sandra Fitzgerald
