

Equine Cremulator

Compact cremulation machine for processing the ash remains after cremation.

Equine Cremulator

The Addfield Equine cremulator is the ideal accessory to accompany any equine cremation business. Constructed from long lasting, rugged mild steel the cremulator rapidly reduces all bone fragments left behind after the cremation process. Grinding them down into a fine, presentable ash in 5 minutes or less.

The cremulator has a dust tight seal on the drum and the lid which prevents leakage and a robust 6mm thick, mild steel blade. The advanced pulverisation system is dust free and shuts off automatically once the process has finished.

Once completed, it is important to leave the ash to settle in the sealed chamber for 5 minutes before emptying into the ash bowl, using the ergonomically friendly pivoting arm.

Ergonomically Friendly

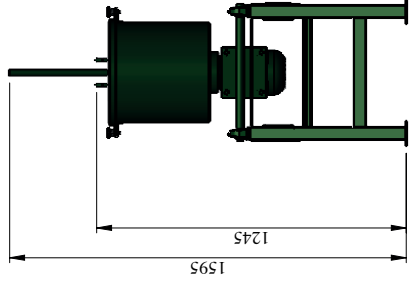

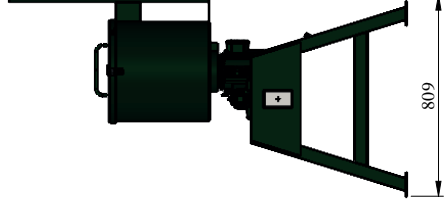

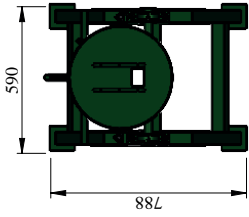

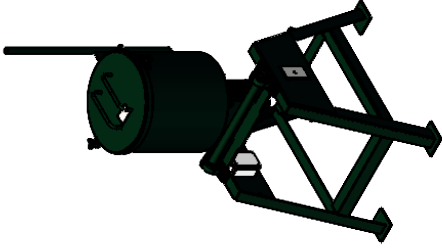

Large horses may require processing in two separate loads. The ash produced by this equipment is consistent and the final results are of the high-quality standard you would expect from any Addfield product.

The equine cremulator is a scaled up version of our successful pet cremulator that is used around the world by pet crematoriums.

Cremulator Specification	
External Length (mm)	809
External Width (mm)	590
External Height (mm)	1245
Chamber Volume (litres)	50
Weight (Approx. kg)	100

*We reserve the right to change the specification, dimensions and quality of materials from time to time, so long as the alteration is minor or an improvement to the said product.
